EDUCATION

Bachelor of Computing - Computer Science (Co-op)

Sep 2024 – May 2029

University of Guelph

Guelph, ON

Relevant Coursework: Java OOP, Software Development in C, Algorithms, Web Design, Operating Systems

SKILLS

Languages Python, C, Java, JavaScript, HTML, CSS, Bash

Frameworks React, Tailwind, Flask, Pygame

Tools Git, Docker, GitHub, Gemini API

PROJECTS

Resume Refiner (Full Stack) [\[LINK\]](#)

GDSC Hacks

Python, React, Gemini API

- Built a Flask backend that sends resumes through the Gemini API to extract keywords, score them against a job description, and return structured suggestions to the React frontend.
- Designed REST endpoints for the React UI, returning parsed fields and keyword-match results as JSON.
- Placed Top 10 of 44 teams; shipped a working end-to-end prototype in 32 hours.

Number – String Converter [\[LINK\]](#)

Python Flask, HTML, JavaScript

- Built a Flask web app that converts between integer values and their English-word form, supporting multi-word phrases up through the trillions in either direction.
- Isolated parsing and formatting logic in a standalone Conversion class so the core methods can be tested independently of the Flask route layer.

Grand Theft Stickman [\[LINK\]](#)

Python, Pygame

- Built a 2D action-adventure game in Python/Pygame featuring multiple scenes (world, bank, gun shop, house), an 8-slot inventory toolbar, and mouse-driven aim/fire combat.
- Designed an OOP architecture (World, Image, Movement, Inputs, FileSave classes) handling collision detection, scene transitions, and CSV save/load across 120+ custom sprites at 120+ FPS.

EXTRA-CURRICULAR ACTIVITIES

Guelph Rocketry Club [\[LINK\]](#)

Sep 2025 – Apr 2026

Web Developer

University of Guelph

- Maintained the club website and built an embedded AI assistant (OpenAI-powered) that answers member and visitor questions about events, resources, and technical documentation 24/7.

Robotics President & Mentor

Sep 2023 – Present

Silverthorn Collegiate Institute Robotics Club

Toronto, ON

- Led a team of 12 to design, wire, and program a 120lb competition robot; wrote autonomous routines and tele-operated control systems in Java (WPILib).
- Implemented PID control loops for precise motor positioning and modeled mechanical assemblies in Fusion360.
- Mentor junior members on Java OOP concepts and iterative engineering design cycles.

WORK EXPERIENCE

Head Marketer (Promoted from Marketer)

Sep 2024 – Apr 2026

Prep101

Guelph, ON

- Managed a team of 12 staff, lifted 60% year-over-year sales growth; engaged with 200+ students daily.
